NEW SCHOOL OF AGRICULTURE AT YOUNGSTOWN

The building of the new Provincial School of Agriculture at Youngstown is progressing favorably, and the prospects are that all will be in readiness for the opening of the school term on October 20. The building is fully modern in every respect and is to be equipped with the most up-to-date conveniences and furnishings in the classrooms.

The barns are also being built and stock are to be brought in at an early date. A silo is being erected in readiness to receive the sunflowers that are to furnish the ensilage for this winter.

Everything points to a very successful start for the new School. Under the present distribution of territory this district is tributary to the Youngstown School. Applications are being received. Boys and girls of the age of sixteen years and over are invited to write for information, an outline of the studies, and application for admittance forms to R. M. Scott, Principal, School of Agriculture, Youngstown. Watch this paper for their advertisement in an early issue. The course is free and covers two winter terms of five months each—the only School for farm boys and girls.

G. M. Johnston tutored to Medicine Hat, Friday, and returned Monday.

United Church

11 a.m.—Sunday School and Adult Bible Class as usual.
No evening service, Sunday September 5.

Surprised at Death of Stock on Canadian Farms

"Of course the thing that strikes a British agriculturist about your farming is the dearth of livestock," said Mr. J. S. MacDonald, editor of the "Farmer and Stock Breeder" (England), who is touring the West with the Imperial Press delegation. "You will be compelled to extend your farming before long, I think."

Mr. MacDonald had just returned from an all day motor trip through the grain fields of Manitoba. He was interested and a little puzzled at the continued grain cropping on western farm lands without manuring. The theory that the ground drew renewal of fertility from the snowfall, he found interesting and thought that the fertilization afforded by the rigorous winter had something to do with it.

"It seems the only explanation of what is otherwise a contradiction of the invariable rule that the land cannot be cropped in wheat without manuring and rotation. The quadrennial summerfallow helps too."

The simplicity of the farming process in Canada struck Mr. MacDonald particularly.

"You can crop wheat here for \$20 an acre, I believe," he said. "The same operation on English fields would cost \$65 to \$85, although, of course, the yield would be larger. There are other points on which you have a great advantage. In all young countries the time comes when a break must be made and nature, having parted with her resources must be systematically helped. The best way is to bring more capital to farming, in other words, farm intensively. This may be most surely achieved by entering into live-stock breeding and feeding."

ACADIA SCHOOL FAIR

The first annual school fair of the Acadia District is to be held at Acadia Valley, on Friday, September 10. Schools taking part will be Lonely Trail, Hopewell, Bryant, Edendale, Bonnie Brier, Grandale, Carlyle. The Olds School of Agriculture will conduct the fair under the direction of the Alberta Dept. of Agriculture.

Class I is confined to garden products, and pupils compete only with pupils from the same school.

Class II is for Grains, in sheaf and threshed.

Class III, Cooking.

Class IV, Sewing.

Class V, Essay on Home Economics.

Class VI, Arts and Manual Arts.

Class VII, Penmanship.

Class VIII, Map Drawing.

Class IX, Live Stock.

Class X, School Competitions.

A good program of sports have been arranged and the relay-race and the tug-of-war are featured. A big attraction and one conducive to the success of the fair will be the attendance of Messrs. Holbrook & McLeod, from Hanna, with their aeroplane. Captain Holbrook will give an exhibition flight during the day.

The local committee in charge are Mrs. K. G. Dalglish, president; Mr. Gifford, secretary; Messrs. D. H. McArthur, J. Young, D. Graham, Messrs. Lorne Free, Chas. Buckingham, Wellington Corry, F. H. Stevens.

Notice to the People of Mayfield and Langholm Districts

A meeting will be held at Wm. Rowles, Sec. 2, 21, 29, on Thursday, September 10, at eight o'clock to consider the advisability of forming a school district to include all the land between the river and Mayfield and Langholm S.D.s. Inspector Cowie will be present.

Miss Gladys Stewart, left for Calgary, on Tuesday.

The first wheat of this season to be received at Calgary, was from the Bindloss district, and graded No. 1; the field gave an average of 22 bushels to the acre.

THURSDAY, Sept. 2, 1920

Going Back To Pre-War Flour

Winnipeg, Aug. 30.—Winnipeg millers expected today to resume manufacturing of the pre-war grades of wheat flour Wednesday following relinquishment of control of grain markets by the Dominion board. No more 95 per cent. flour would be milled, they said. A drop of \$1 a barrel on the higher grades and 1.50 on the government standard grades is expected to result immediately. It was believed

probable today that many of the mills in this district would resume operations by the latter part of the week.

Another Guess At Wheat Prices

Prince Albert, August 28.—That the eventual price of western Canada wheat will not be higher than \$2.85 a bushel, is the opinion of William Moffat, general manager of the Imperial Bank of Canada, who with Vice-President Merritt of St. Catherine's, and Col. J. F. Mielie, one of the directors, is here on an official visit.

Mr. Moffat considers 225,000 bushels as the correct estimate of the western wheat crop. Mr. Moffat says that money is very tight. The largest operators on the continent have to pay 8 per cent. for money. Thrift and greater production is Mr. Moffat's advice. Sound, legitimate business will be financed adequately by the banks, but there is no cash for any other enterprise.

E. J. BOSWELL

The following case was heard in the local court before justices D. McEachern and H. H. Hall; Mrs. Anna Madsen, plaintiff, charged, her father, A. S. Cool, defendant, "for unlawfully detaining a child under 14 years of age with intent to deprive the legal guardian of the possession of such child." The child in question was Violet Alameda Stearns, aged 12 years; the mother had obtained a divorce from the father in 1910, and had been given full custody of the child until she was 18 years of age. The court decided that insufficient evidence had been submitted to commit the accused for trial and he was accordingly dismissed. No attempt was made by defendant to retain possession of the child and she was taken in charge by Mrs. Madsen.

THE MODERN EXCELSIOR

The times and modes are changing fast; Old methods now have long since passed; And those who reach the top-most rung Cry to the world in every tongue:

"Advertise!"

The old man said, "I'd have you know

My stock is 'good, but business slow."

Then youth replied, "What's wrong with print?

In clear black type, or even tint?"

"Advertise!"

"These gowes I've made," the maiden sighed;

"I cannot sell, although I've tried;

They're first-class work and tip-top stuff!

Then came the answer deep and groff;

"Advertise!"

If you would make a sure success,

Your trade-mark on men's minds impress;

Display your goods in printer's ink

Whatever you do or say or think—

"Advertise!"

Get your typewriter supplies printed stationery, counter check books, etc. from the Empress Express.

ECONOMY?

A couple of young people were married in New York in overalls.

The wedding took place at one of the big hotels, and cost \$1250. There are no fools like old ones, except young ones.—Saskatoon Star.

IMPORTANT NOTICE

Tax Recovery Act

To all parties whom it may Concern:

Take notice that the provisions of the Tax Recovery Act are operative for the year 1920 within the limits of every municipality, urban and rural, and every Improvement District of the Province of Alberta.

The land will be advertised for sale, as soon after August 15th as possible, by the Municipal taxing authority and on the day and hour and at the place mentioned in the advertisement, will be sold for the taxes in arrears as of date December 31, 1919, together with the costs. Owners, mortgagees, encumbrances, and any others interested should communicate with the municipal authority levying the tax. The arrears and costs may be paid up to the time of sale, and after the sale there is one year for the redemption of the land.

J. H. LAMB,
Deputy Minister of Municipal Affairs.

TAX SALE

Sale of Lands in the Municipal District of Acadia, No. 241 for Arrears of Taxes

Notice is hereby given, that certain lands in the Municipal District of Acadia, No. 241 will be offered for sale for arrears of taxes and costs on Friday the 30th day of October, at the hour of one o'clock in the afternoon in the Acadia Valley Hall, at Acadia Valley, Alta.

And that a printed list of the said lands may be obtained on application to me. And further, take notice that unless the taxes and costs be sooner paid, I will proceed to sell the lands for taxes at the time and place mentioned in this advertisement.

D. M. ORLAND,
Secretary-Treasurer

JOHN I. STOUDT

Empress Receives First

Aeroplane Visit

Messrs. Holbrook and Macleod, of Hanna, Alta., arrived in our town via aeroplane route on Friday last. They are the first aeroplane men to visit this part of the country. During their stay here many of the town and country people took advantage of the opportunity of taking passenger flights in the plane. In fact it seemed that the whole town and a considerable part of the country were up in the air.

Ye Editor had the opportunity of taking the first flight, and had a chance to take a look at the country from a little distance off the ground—after Joe Carruthers had got everybody lined up and had taken a picture of the crowd, aeroplane, pilot, and mechanics and passenger. Messrs Holbrook and Macleod said Empress is one of the prettiest spots they have visited. With the waters of the two rivers winding in and out, the Saskatchewan a deep blue and the Red Deer a brownish color; Cabri Lake away in the distance with tall whitish columns arising from its surface, sheafs of grain in stacks, with trolinge turning into variegated colors, helped to make the scene below look like a huge colored map. Roadways and fences cut the land into squares and oblongs, while men and beasts looked like dots and small ant-like creatures. Railway, ravines and

lorry seemed ludicrously small. The section farm appeared as an oblong patch of but a few acres. Our town seemed to be very scattered and did not look to be comprised of as large a number of buildings as when seen from the ground.

Our visitors were busy on both Saturday and Sunday. Capt. Holbrook made an exhibition flight on the latter day. Besides business men and others a number of women and children made passenger flights. Messrs. Holbrook and Macleod, who left on Tuesday, for Jenner, reported that they were well pleased with their stay in Empress.

Mrs. H. G. Moore and Miss Faucet, of Bindloss, were Empress visitors on Wednesday.

Mr. and Mrs. E. A. Sprague who have been visiting the former's mother, Mrs. C. C. Ross, of Castle Coombe, left Wednesday, for their home in Winnipeg.

An exchange says that gossip have motor cars beaten to a frazzle when it comes to running down people.

The local nimrods were making preparations Tuesday, for the opening of the duck shooting season in Alberta, on Wednesday.

Rev. and Mrs. G. G. Pybus and family, and Mrs. Herschman, left for Medicine Hat this morning, where Mr. Pybus will attend the district meetings. From there they will go on to Lethbridge, for a trip.

Reg. Poole, who is now travelling for the D. Ackland Co., of Regina, was in town Wednesday.

"Bill" Young returned to town on Saturday, he was formerly a member of the local staff of the Bank of Commerce.

Dull, wet weather of the past few days has caused a stoppage in threshing operations.

Wheat on the A. L. Fosley farm is reported to have given returns of from 17 bushels to 20 bushels to the acre.

Mr. and Mrs. A. E. Galloway and family made a trip to Medicine Hat, over the week end.

We are pleased to learn that H. C. Shepherd who is now in a sanatorium in California is progressing steadily forward to good health.

We have been informed that Dentist Rourke has rented office rooms in the Braithwaite Block, and intends to locate in Lender.—Enterprise, Lender.

Horb. Porter, of Acadia Valley, hauled the first flax from this season's crop to town, on Friday last. The amount was 214 bushels, and graded No. 1. Mr. Porter said his flax crop yielded an average of ten bushels to the acre.

The Calamity Howler

A dog sat out by the midnight chill and howled at the beaming moon; his knowledge of music was strictly nil and his voice was out of tune.

And he howled and howled as the hours went by, while

dodging the bricks we threw till the moon was low in the western sky, and his voice was split in two.

And there wasn't a thing at

Look to the Foundations

For the first time in the history of the United States the population of the cities and towns at present exceeds the rural population. This is the interesting but at the same time disquieting fact disclosed by the recent census of the republic. While all the figures have not yet been tabulated, examination of the returns is sufficiently far advanced to warrant the above statement, according to officials.

It had, of course, been known for a long time that one of the effects of the wonderful industrial activity brought about in the United States by the war was the exodus of people to the larger centres of population to which they were attracted by the prevailing high wages and by a demand for workers which opened to energetic and capable men, and women, too, splendid opportunities for a rapid advancement. Then, too, thousands of young men drafted from the farm into the army have not returned to the land upon their discharge from military service which, if it does not actually take them overseas, brought them into cantonments and camps on the outskirts of centres of population and introduced them to city life.

The same shifting of population is, unfortunately, taking place in Canada. While it is doubtful that the urban population of the Dominion has actually outstripped the rural, as in the United States, we are on the high road to such a development. In the old farming Province of Ontario this has already taken place, and but for the fact that the prairie provinces are still dominantly rural, the figures for Canada might easily be similar to those of the United States.

Proportionately it is said that 50,000 fewer Canadians are engaged in agriculture today than in 1910. According to a recent speech by the Ontario Minister of Agriculture, 30 percent of the population some 48 years ago lived in towns and 70 percent in the country. Today the figures are almost exactly reversed—the 70 percent in Ontario live in the towns.

In a recent article in this column the question was asked as to what was the explanation, and certain views were expressed as to steps that might be taken to check this disastrous tendency on the part of young people to get away from the land. Nothing is to be gained, however, by blinking the fact, now generally recognized and admitted, that the industrial advancement of the Dominion has been encouraged at the expense of the agricultural. Country life has not been made attractive enough at a time when the attractions of city life have multiplied amazingly; farming has not been sufficiently remunerative during a period when mounting wages coupled with steadily shorter hours of labor have called their appeal from the cities.

The natural, the inevitable result is the increase in the consuming public and the decrease in the number of producers. As Hon. Mr. Doherty put it: "We have believed that big smokestacks spell happiness and prosperity.... But the real solution of all our troubles is increased production and production." Who can question this?

Surveys of the monetary equivalent of the returns of the average farmer in the Dominion were recently made showing that the majority were making less than \$1,000 a year. Thirty cents an hour was the average wage of both a farmer and his wife on a 100-acre farm in the year of the armistice—a figure which the unskilled city laborer and charwoman would reject with scorn. Needless to say such a return is in itself sufficient to explain why the second generation deserts the farm, without giving consideration to other factors in the problem.

There ever was a time, when the agricultural industry needed more generous assistance and encouragement.

Every Tea and Coffee Drinker finds a new and delightful flavor the first time he tries

INSTANT POSTUM

A health drink for meal-times

"There's a Reason" — at grocers!

ment. It calls for the best thought on the part of all Governments and public bodies. The Dominion is growing top heavy, and while those at the top may not at the moment fully realize their danger, they are occupying a perilous position, and in their own interests and for their future self-protection it is high time they began to look to the agricultural foundations upon which all industry in Canada primarily rests.

Cures Constipation In A Sensible Way

They Work While You Sleep—Cost Only a Quarter—And Really Bring Lasting Results

It only takes one night to prove the wonder-working power of Dr. Hamilton's Pills. They are the smoothest, easiest acting laxative yet devised, the kind that a child or delicate person can use with comfort. You can cure constipation quickly, safely and safely with Dr. Hamilton's Pills. Headaches you can banish for all time. Impaired digestion you can promptly restore. Loss of appetite, languished by a keen desire to eat.

The blood is enriched and reddened, in consequence you are given new strength and vital energy. Folks who are half sick, sort of run down, lacking in spirit and energy, those who find a day's toil exhausts mind and body—these are the people who can be restored by Hamilton's Pills to vigorous health that will outlast old age. Get a few 25c boxes of Hamilton's Pills today, everywhere.

Uses For Inferior Fruit

Okanagan Growers Will Manufacture Fruit Juices

The Okanagan United Growers, the big Okanagan cooperative concern, has started a subsidiary company this year which will make use of all the poor fruit, which makes up a large part of the year's crop, which is discarded.

For too long, says an Exchange, British Columbia growers have shipped their inferior fruit to the fresh fruit markets, where it has pulled down the price of the better grades.

It is a well known marketing rule that whenever a cheaper article comes onto the market, quotations of the better varieties drop to lower levels.

Then why do British Columbia fruit growers send this cheap fruit to market? Because they have no facilities to handle it so that some returns, however small, may be received. Now they intend manufacturing large quantities of inferior fruit into cider and fruit juices of various flavors.

The apple cider business is only in its infancy, and British Columbia up to the present has not taken advantage of this business in a big way. There are, to be sure, a number of cider mills scattered throughout the province but not nearly enough.

And not only is cider in demand, but other fruit juices, Logans and the juices of other berries make palatable drinks.

Every year in the Fraser Valley there must be lost hundreds and hundreds of dollars' worth of fruit that is too ripe to ship. This could all be utilized in making fruit juices.

Minard's Liniment Relieves Gargle In Cows.

Promoter of Egg Production John Ross Higgins, of Kempenfelt, has been appointed by the civil service commission promoter of egg production, department of agriculture for the province of Alberta.

Fifty-seven percent of all former Austria-Hungarian mills are located in the Czechoslovak republic.

Repentance is often compounded with determination not to get caught again.

States Will Want

Alberta Cattle

Live Stock Man From Chicago Sees A Market For Canadian Product

That there will be an enormous demand for Canadian feeders and stockers in the United States this fall, is the information given by A. A. Walters of the firm of Walters & Dunbar, one of the principal livestock commission houses in Chicago. Mr. Walters is at present in the West, looking into the cattle situation generally. He stated that without the slightest doubt stock raisers on the other side of the line this year would be able to absorb all the feeders and stockers that Alberta can offer this year at good prices.

According to Mr. Walters Canadian cattle are pre-eminently suited for finishing purposes, compared to those from the southern and southwestern states, and he is sure to stand the winter much better.

Every effort on the part of cattlemen he said, were being taken to bring the present tariff bill on Canadian cattle which was now before the Senate, and which had been passed by the lower house. The Senate, however, would not meet until December next, so that there would be no question about the free importation of animals this fall.

While the demand was great at the present time for Canadian stockers and feeders this would be much more noticeable in about thirty days, as farmers in the corn belt were busy just now harvesting, by September first they would be through and will be the market for all the Canadian cattle they could lay their hands on. One of the most important statements of Mr. Walters was that these farmers are ready to give any assistance from the banks in connection with the purchase of these cattle.

They were mostly brought in comparatively small individual lots and had ample means of providing all funds necessary. The principal sales were made in the Chicago market, also at St. Paul and Winnipeg. "Canadian cattle rank very high in the United States," continued Mr. Walters, "they put on weight quickly and experiments carried out on a large scale prove conclusively that they are satisfactory in every way."

The South African Sweet

A remarkable sweet substance in the leaves of a South African plant was brought to notice several years ago and was declared to be 100 times as sweet as cane sugar. The material has been found to be not a true sugar but a glycerine. The plant seems to have no difficulty to obtain, but the U. S. Department of Agriculture has succeeded in getting a number of samples of the dried leaves and material.

"Canadian cattle rank very high in the United States," continued Mr. Walters, "they put on weight quickly and experiments carried out on a large scale prove conclusively that they are satisfactory in every way."

Crop Prospects

Estimates Wheat Yield at 250,000,000 Bushels

Canada's wheat fields will yield from 226,000,000 to 250,000,000 bushels this year. This estimate has been made by W. A. Black, vice-president and managing director of the Ogilvie Milling Company, and is based upon crop reports received by the company from its agents. Compared with last year's yield, this is an increase of 50,000,000 to 75,000,000 bushels.

The indications of worms are restlessness, grinding of the teeth, picking of the nose, external irritations, often convulsions. Under these conditions the best remedy that can be got is Miller's Worm Powder. They will attack the worms as soon as administered and will grind them to atoms that pass away in the evacuations. The little sufferer will be immediately eased and a return of the attack will not be likely.

Alberta to Protect Birds

Alberta is providing protection for migratory birds by the establishment of seven large sanctuaries.

A FRIEND OF THE POLICEMAN

Continually on their feet, the "Policemen" are invariably troubled with corns and bunions—but not for long, because they know of a quick cure, Putnam's Corn Extractor; it cures corns in 24 hours; try "Putnam's," 25c at all dealers.

Peddle German Money

Smart Salesmen From U. S. Pick Up Fortune in Ontario

It is reported that two smart salesmen from across the line, both of German descent, have been peddling German marks, or coupons therefor, through the German settlements of western Ontario, particularly around Hanover, Tavistock and Shakespeare. They are said to get a commission of fifty cents on the dollar and to have cleaned up a hundred thousand dollars in one week. Apparently they are working on behalf of New York, cork brokers.

The people among whom they are working are extremely conservative, and prefer to leave their money at three and a half percent in the savings bank than risk it in speculation.

But the appeal is racial. They are told that the money they invest will help to put the fatherland on its feet, and that then, with the mark restored to its true value, they will make a great profit. Needless to say they are paying a great deal more than current exchange for the mark, which they could buy over any Canadian bank counter.

Among the victims it is said that two old Montserratians, who have lived savings of ten thousand dollars out of the savings bank and invested the money in German marks at two and three times their current value, are being eluded.

Thousands of mothers can testify to the virtue of Mother Gray's Worm Exterminator, because they know from experience how useful it is.

Don't marry a girl who thinks she might learn to love you. A little learning is a dangerous thing.

Few men decline a nomination for office when they think there is any show of being elected.

Leaving the Rural Districts

U. S. 1920 Census Will Show a Large Increase in Cities and Towns

For the first time in the history of the United States, the 1920 census returns will show that more persons live in the cities and towns than in the rural territory, officials of the census bureau estimated.

When the final tabulations are completed, the officials declared, they expect it to be shown that 51 or 52 percent of the total population of the continental United States reside in urban districts.

"There has been a very great tendency towards large increases in the cities and towns, which we cannot account for, unless it has come from the country," said Samuel L. Rogers, director of the census. "This tendency towards the cities has been apparent for some time."

It's difficult to convince a man that his money isn't a sure thing until after the race.

A Corrector of Pulmonary Troubles. Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in curing disorders of the respiratory processes, but the best testimony is experience, and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allow inflammation in the bronchial tubes as no other preparation can.

A Case of Explosives Magistrate—What is the charge? Prisoner—Intoxicated, your honor. Magistrate (to prisoner) What's your name? Prisoner—Gunn, sir. Magistrate—Well, Gunn, I'll discharge you this time, but you must not get loaded again. — London Trib.

Minard's Liniment Relieves Diarrhoea. It is abundantly clear for a woman to have a headache when she can't think of any other excuse.

Let "Dandarine" save you hair and double its beauty. You can have lots of long, thick, strong, lustrous, hair. All't be as lifeless, thin, scraggly or fading. Bring back its color, vigor and vitality.

Get a 3-cent bottle of delightful "Dandarine" at any drug or beauty counter to freshen your scalp; check dandruff and falling hair. Your hair needs this stimulating tonic; then its life, color, brightness and abundance will return—Hurry!

WIDE STAR YEAST CAKES

PROVEN BEST BY TEST

Baking Contest EDMONTON EXHIBITION JULY 1920

There were 349 entries in Five Classes for Bread and Buns made with Yeast. All FIVE FIRSTS, FOUR SECONDS, AND FIVE THIRDS, FOUR FORTHES, ONE FIFTH, TWO SIXTHS, AND EIGHT, NINTHS, AND TENTHS, or a total of 34 OUT OF 34 PRIZES, OR 100% OF ALL AWARDS

Exhibitors NOT USING White Star took only ONE PRIZE out of the SEVENTH

CHILDREN'S CONTEST Exhibits made with WHITE STAR YEAST took ALL PRIZES

If your grocer does not handle White Star Yeast write to direct THE WHITE STAR MANUFACTURING CO. LTD., WINNIPEG, MAN.

Just Imagine—

As you know, you would make it if you could with out an orchard of One Thousand Acres of ripe, luscious fruit, in the pick of condition, picking only other with the same amount of labor, and with the same amount of money, and with the same amount of time, and with the same amount of effort, and with the same amount of skill, and with the same amount of knowledge, and with the same amount of experience, and with the same amount of patience, and with the same amount of perseverance, and with the same amount of determination, and with the same amount of courage, and with the same amount of faith, and with the same amount of hope, and with the same amount of charity, and with the same amount of love, and with the same amount of peace, and with the same amount of joy, and with the same amount of happiness, and with the same amount of contentment, and with the same amount of satisfaction, and with the same amount of fulfillment, and with the same amount of completion, and with the same amount of perfection, and with the same amount of excellence, and with the same amount of greatness, and with the same amount of glory, and with the same amount of honor, and with the same amount of respect, and with the same amount of admiration, and with the same amount of awe, and with the same amount of wonder, and with the same amount of amazement, and with the same amount of astonishment, and with the same amount of surprise, and with the same amount of delight, and with the same amount of pleasure, and with the same amount of enjoyment, and with the same amount of fun, and with the same amount of amusement, and with the same amount of entertainment, and with the same amount of recreation, and with the same amount of relaxation, and with the same amount of refreshment, and with the same amount of rejuvenation, and with the same amount of revitalization, and with the same amount of regeneration, and with the same amount of resurrection, and with the same amount of redemption, and with the same amount of deliverance, and with the same amount of liberation, and with the same amount of emancipation, and with the same amount of freedom, and with the same amount of independence, and with the same amount of self-reliance, and with the same amount of self-sufficiency, and with the same amount of self-dependence, and with the same amount of self-respect, and with the same amount of self-esteem, and

Small Farms of Available Land Is Under Cultivation

Among the natural resources of Canada agricultural land is by far the most important, the value of field crops alone being four times as great in 1919 as that of all other raw products of mines, fisheries and forests combined.

Canada has a land area of 2,306,502,400 acres, but obviously much of this is not adapted for cultivation. Without taking into consideration forest or swamp land, much of which will ultimately be tilled, nor of unexplored northern areas, there remains at least 300,000,000 acres available for agricultural development.

Only about one-sixth of these 300 million acres are under cultivation, and 250 million are still unimproved. It is estimated that there are in Canada about 180 million acres of agricultural land in private ownership with a rural population of four and a half millions; in other words, not taking in account mining, lumbering, fishing, domestic duties and other activities, each Canadian man, woman and child living outside of a town may on the average be assumed to be farming forty acres.

In northern Europe the rural population on the same basis, but with far less developed population is attending to 445 acres per head.

To utilize the agricultural land and thus widen the basis factor of Canada's production, it is considered important, for it is on this that the development of the other natural resources depend. The day of the free homestead within reach of a railway is rapidly becoming a thing of the past, and means other than free grants must be looked to for rural development.

Brooding and Feeding Chicks

Methods Have Changed Considerably And Breeders Should Be Up-to-Date

Brooding methods have undergone considerable changes, and in small flocks the portable brooder is undoubtedly the most satisfactory, but even with comparatively large flocks some of the new brooding methods are called the pioneer in this field. The advantage of these stoves is that they can brood large flocks at a comparatively small cost. The portable brooder is the system that was formerly used on large plants and is still largely employed. It gives excellent satisfaction but is so expensive to install that the stove brooders are largely supplanting it.

These stove brooders can be used as an ordinary colony house, thus avoiding the necessity of a special brooder house. They are made in different sizes and will accommodate either a few or small flocks. Five hundred chicks can be attended in a colony house with almost as little labor as 50 in a small brooder, and the additional cost is comparatively low.

When the chicks are removed from the incubator care should be taken to avoid chilling. The stove brooder should be so heated that they will be able to get a temperature of 100 degrees.

At 100 degrees are heated to 90 or 95 degrees before the chicks are put in them the heat generated by the chicks will bring it up to the desired temperature. The stove brooder gives the chicks as low a temperature as is consistent with their comfort. The temperature should be gradually reduced, but never so fast as to cause any discomfort to the chicks.

With the brooder stoves the chicks learn to stand at a low temperature. If they want a little more heat they can get a little closer to the stove, if they get too warm they can spread out. It is only when the chicks are first put into the house to which the chicks are confined until they become used to the new quarters and get accustomed to the source of heat, then the fence may be removed. For this purpose a strip of red roofing is often used as a guide to perfection, as it is easily handled and it breaks the draughts, which are likely to be along the floor and which are one of the dangers that should be guarded against in this method of brooding.

Canadian Flax

European Buyers Contract For 1920 Crop at High Price

The Department of Trade and Commerce of Canada has decided to prepare flax of the flax industry, showing the present position, pulling, scattering, the manufacture of yarns, and all other operations that are necessary in the manufacture of flax. The present position of the flax industry in Ontario is such that flax is being raised in large quantities. The acreage will, however, be the largest in the history of the Dominion. European buyers are already purchasing or contracting for the 1920 crop at prices much higher than were received for last year's flax. It is estimated that there will be 40,000 acres under flax in the prairie province this year, and the province of Quebec will also have very considerable acreage. The outlook in general is for a record production, and the high water mark in prices is expected to be reached.

A girl who doesn't know one card from another may be an adept at holding hands.

Pride is the most expensive thing a man can have—with the possible exception of a wife.

Canada's Early Newspapers

The First Daily Paper Was Published In 1833

The delegates to the Imperial Press Conference are members of a profession many centuries old. The word newspaper is capable of so many interpretations that it would be difficult to give a definition of the word. It is called the pioneer in this field. The Acta Diurna of ancient Rome were chronicles of events, and China had what might be called newspapers as long ago as the sixth and seventh centuries. In the more modern sense the Oxford Gazette of 1665, might be described as the first English newspaper. The name Gazette was a favorite one with early publications. It came from Italy and is traced by some to the Greek word "Gazeta," a treasury, which in turn hailed from Persia. But the preferred derivation is from the Greek word "Gazeta," which was the fee charged for hearing the reading of a manuscript "newspaper" at Venice during the war between the Venetians and the Turks. Uncharitably-minded people point out that the same word means a magpie or chatter.

In Canada, at about the time the Gazette was the early favorite in the journalistic world, so much so that the word was used by the newspapers in this country bore that name. They were: Halifax Gazette, 1752; Quebec Gazette, 1764; Nova Scotia Gazette, 1772; Gazette of the Montreal (Montreal) 1787; St. John's Gazette, and New Brunswick Advertiser, 1784; Montreal Gazette, 1785; Royal Gazette (Charlottetown), 1791; Upper Canada Gazette (Nelson), 1793.

The first daily newspaper in Canada was the Montreal Advertiser, 1833. There is record of a Royal Standard published daily at Toronto in 1836, and the Kingston Whig, still flourishing, was a daily in 1849. In 1850 a Daily Telegraph had a short and unexciting career in Toronto.

It is not generally known that the Christian Guard was the oldest publication in Toronto, dating from 1828.—Toronto Star.

Just An Old Shoe

Gives Comfort When Needed And Never Resents Abuse

What better friend can man or woman have than an old shoe? Of course, it is not of any value as a shoe, but it is a very good friend in company with it on. You wouldn't even bother cleaning it up or giving it any care. It lies in the corner of the closet, and you don't think of it until you need it. You would be surprised to find out how many people are using old shoes. You would be surprised to find out how many people are using old shoes. You would be surprised to find out how many people are using old shoes.

When you come home, pull off the offending "last style" and sink your burning, tortured foot into the soft, cool, spacious depths of the OLD SHOE. What a comfort! What ease!—What a heavenly feeling.

God bless the old shoe which is able to hold the foot steady and give comfort and relief in your time of trouble and which never talks back or resents your thoughtlessness if it is between times. A handy, comforting thing is the old shoe, that costs you nothing, doesn't need to be bothered about or feared over, but is always there when needed.

And God bless the "old shoes" of the human race who are always there for the other fellows over the rough spots.

The X-Ray Detective

Shows Up Diamonds Secreted by the South African Native

Diamond stealing in the South African mines is becoming a precarious business. The blacks still swallow the bait of the diamond, but the methods no longer suffice. Coolidge X-ray tubes are so mounted in a frame as to illuminate the whole body of the miner, and the whole body of the miner is given native standing before them. The entire body of the hundreds of miners can thus be brought into view in the furnace in a few seconds and any diamond present, even if behind thick bones, is quickly detected. The glow of the diamond in the X-ray, as well as its dense opaqueness, aids in detection, it is said.

It's a fact that a woman can't understand why her husband doesn't play old bachelors more than he does.

Home-made advice is just as satisfactory as any other brand.

Present Output of Alberta Coal Mines Is Far Below Capacity

To what extent the Alberta coal industry is being developed is indicated by official figures that have now been published for the first six months of this year, compared with a corresponding period in 1919. These figures are absolutely authentic, as they have been given out by the federal government.

They point to the fact that much progress is being made, but while this may be so all Alberta operators are unanimously agreed that if a satisfactory freight rate could be obtained to Manitoba and other eastern points that the quantity that is at present being shipped would only be a tithe of what could be exported.

The official figures up to the end of June this year give an output of 3,043,940 tons, compared with 2,068,707 last year. This is for both bituminous and lignite product. It is doubtful, however, in the face of the paucity of orders that have been obtained since the end of the period mentioned that the showing will be exceptionally good.

It is a matter over which the operators have no control; in other words, if there has been a falling off in orders the whole output must be curtailed. The operators are unanimous in their opinion that the quantities are concerned that the fringe of the industry has as yet been but little developed.

Summed up in a nutshell, operators state, however, that there has been

more coal marketed up to this time than in the history of coal production in Alberta. It should also be pointed out that more coal will be required from these mines than ever before on account of the shortage of coal from the United States.

The present prospects as far as the Winnipeg market is concerned, operators state, is most encouraging. The actual output, however, to that market, and to further eastern points will solely depend upon freight rates. If these are prohibitive, it will mean that a staggering blow will be dealt the industry.

The provincial government has recently been carrying on with some measure of success a very active propaganda in Manitoba and Saskatchewan. This has been greatly helped by the shortage of coal from the United States.

While the bituminous mines in Alberta have been working at full capacity, the lignite fields, owing to lack of orders, have for some time now fallen far short of this; indeed, in the majority of cases this output has been only about half of what they could turn out.

It is pointed out that the cost of production of the coal is enormous, and that 10,000,000 tons a year could be a fraction of what could be produced. It is asserted that the "big capacity" of these fields could take care of more than the figure mentioned.—Calgary Herald.

Farmers Advised To Ship Their Wool

Seems To Be No Advantage in Holding For A Better Market

Although 200,000 pounds of wool has already been shipped to the east from Alberta, W. N. Gibson, assistant manager of the Calgary exhibition is of the opinion that wool growers in the province are holding back considerable in the hopes of higher prices.

This, Mr. Gibson, states is a mistake. The Canadian Co-operative Wool Growers' Association at Weston, Ont., to whom the wool is shipped, is working the best market for wool growers, and will dispose of it in the very best market obtainable, and at the very best price.

Mr. Gibson declares that the market for wool is getting better, but is not as good as it was a few years ago. He says that any advance which may be realized is the fact that later on the bright side of the east will undoubtedly increase, which will work to the disadvantage of the growers who hold their wool for the better market.

Under these conditions Mr. Gibson advises the immediate shipment of wool for dispatch to the east. The wool is being sent up in Calgary as soon as received and are sent east where the proper grading is done, and the wool is then disposed of in the best market.

Mr. Gibson says the eastern firm handling the commodity is not a private firm, but is working wholly in the interest of the wool growers. He says the west in the handling of these shipments. Mr. Gibson believes it would be a great mistake for farmers and ranchers to dispose of their sheep in view of the outlook for abundance of feed, and also the fact that the wool market is showing an improvement.—Calgary Herald.

New Western Map

Shows All Land Available For Homesteaders

A new edition of a map of Manitoba and Saskatchewan and Alberta giving the number of quarter-sections available for homestead entry in each township with the boundaries and offices of government land agencies has been issued by the Natural Resources Intelligence Branch of the Department of the Interior. This new edition clearly indicates all railways, forest lands, parks and Indian reserves, also the land which has been reserved for soldier settlement purposes. The size of the map is 24 inches by 36 inches and the scale 35 miles to one inch. The importance of the new edition at the present time is apparent in prospective settlers, land agencies, in fact everyone interested in the development of land in the western provinces. A copy of this publication, which is known as the "Small Land Map of Manitoba, Saskatchewan and Alberta," may be obtained free of charge by applying to the Superintendent of the Natural Resources Intelligence Branch of the Department of the Interior, at Ottawa.

Sawdust Serves Many Purposes

Makes Excellent Gas For Light-ing and Heating

Until quite recent times sawdust was regarded in wood mills as a waste product, but now it serves many purposes and has a commercial value of something like ten shillings a hundred weight.

Sawdust is particularly useful in the manufacture of various building materials. Mixed with clay it makes a good material for bricks, while combined with concrete, an economical and good-wearing flooring material is obtained.

The French chemists believe the discovery of sawdust gas. They found that a combination of various chemicals acting upon sawdust produced a gas which was used in making brick. It was first treated with chemical agents to extract certain harmful ingredients, after which it was pumped out and baked in the usual manner.

Probably the most remarkable discovery of all is that a gas excellent for both lighting and heating purposes, can be made from sawdust. From experiments that have been made in America it is believed that, particularly in the neighborhood of sawmills, the gas could be produced so cheaply as to be supplied for a few pence per thousand feet.—Toronto Weekly.

To Cure Disease in Stock

Board Will Formulate Plans For Controlling and Eradicating Disease

At a meeting held in Toronto on Thursday, May 14, the first steps were taken in the organization of a body to be known as the "Animal Health Board of Canada." The name implies, the board has for its object the formulation and carrying out of plans for controlling diseases in stock. It is being organized with the intention of paying particular attention at this time to tuberculosis of live stock, disease which contributes to a great extent to the loss of products by reason of the necessity for condemning, as unfit for human food, carcasses or portions of carcasses of tuberculous animals.

The board is composed of twelve members, four from the livestock associations, four from the meat inspectors, and four from the Federal Department of Agriculture, and the headquarters of the board will be at Ottawa. Co-operation with public health, and public health boards will be sought.

Some men don't want to talk about justice after they get it.

Lieut. Florin Sandes

Fought With Serbian Army Until November, 1916

Miss Florin Sandes, lieutenant Florin Sandes of the Serbian army, is visiting Australia to interest the Commonwealth in measures for the amelioration of the country she served on the battlefield.

Miss Sandes went to Serbia with a party of V. A. D.'s in August, 1914; after later she joined the Serbian Army, and fought in every battle until November, 1916, when she received 24 wounds and was left on the field of battle. She was returned and after six months rejoined the army and took part in the last victories of the offensive.

Lieutenant Sandes holds a commissioned rank by virtue of a special award of the Serbian Parliament, and she has been given 12 months leave of absence by the Crown Prince of Serbia, in order that she may lecture in Australia and obtain supplies of agricultural machinery and other necessities. Miss Sandes has also decorations which include the Serbian equivalent of the Victoria Cross.

Wind Resistance

Average Man When Walking Pushes One Half Pound

The average man, walking briskly, travels at about four miles per hour. His body presents to the air a surface of about 6 feet in height to one foot in width, or about six square feet. Moving at four miles per hour, he is travelling at 5.8 feet per second, and the resistance opposed to his forward motion by the air, assuming it to be still, is just about 1/2 pound. In other words, he is constantly pushing a 1/2 pound resistance ahead of him as he walks.

If the same man walking four miles per hour were facing a gale blowing 25 miles per hour, the relative velocity of the wind would be 30 miles per hour, and the man would be walking against a pressure of over 26 pounds. This would be enough to make an appreciable difference in the ease of walking and he would readily notice it.—Motor for July.

British Aviators Greet Americans

From a London dinner given to the survivors of the first 100 aviators to receive the service, Capt. R. S. D. in the war, the Aero Club of America has received this message:

"This assemblage of the survivors of the first 100 British aviators, and the pioneers of British aviation, send cordial greetings to their American comrades of the British, and desire to join in united acknowledgments of the glorious achievements of America in the conquest of the air."

Success of Swedish Colony

Irrigation From the Bow River Has Transformed Semi-Barren Country

The Swedish Colony, on the Bow Slope, some 30 miles northwest of Brooks, Alberta, is distinguishing itself in the history of Canadian irrigation. Although it is only three years since the first of these settlers came to the district, a tract of country containing twenty-two square miles is now almost completely settled. On approaching the settlement the traveller is surprised to see how the irrigation water from the Bow River has transformed the earlier semi-barren country into a veritable oasis with beautiful fields of flax, wheat and oats. Cows-keeping here is also being carried on, and numerous little canals give the stranger an impression of a Dutch village. The crop situation within the colony is being promising. A large acreage of flax is being raised this year on new breaking, while wheat and oats are producing crops on the farms of the settlers. The soil is of the highest quality and very productive. In a talk with a wealthy farmer from the latter said the soil here, when properly worked up should be capable of producing an average of fifty bushels of wheat to the acre.

About three times as much land as last year is under cultivation this season and the crop is looking even better than last year's. In one place there are eighteen bushels of flax was harvested on the Bow Slope. The settlers are 90 percent Swedish, and are from Sweden, Norway, Washington and Dakota principally. The remaining five percent are Norwegians and Danes. They are all well established as first class farmers, hard working and industrious. Improved farms are already high in value and hardly any are offered for sale. There are farmers within the district who would not sell their land at a price of \$200 an acre, so confident are they of the future of the settlement.

Thoroughness

This world wants more men who are thorough. We have so many starters, but so few finishers.

Point out a dozen men who have been successful in life, and investigate their lives. You will find that every man who has been a finisher, a stayer and a hustler.

Thoroughness is the true test of permanency.

The half and half humans who never complete, never perfect, are holding back the progress of the world.

The fellow who puts the coping on a job; who completes the thing, is in big demand.

FOR SALE BY PRIVATE TREATY

Five Cows, 2 and 3 years old, with calves at foot.

Two Heifers, 18 mths. and 2 yrs. old
Team of Ponies, mare and gelding,
grey, drive double or single, age 3 and 5 years, weight
about 1000 lbs.

Labour Day, Monday next, September 6.

E. L. Kenny was a visitor to Medicine Hat over the week end.

Rev. A. Johnson, of Castan Coombe, is visiting relatives at Huosier, Sask.

R. M. Henderson moved into his new office building, next to W. R. Brodie's store, this week.

Born—To Mr. and Mrs. Geo. Malton, of Swallow, Alta., at Empress, Sunday, August 29, a son, Samuel George.

Mrs. E. J. Nielson, of Bonnie Brier, left on Monday, for Philadelphia, Pa., to see her mother, whose health is failing rapidly.

D. McEachern has been appointed to the town and school secretariats. He is using the next-door building to the post office for office purposes.

J. A. Toombs, the local jeweler, is now located in his new store on Centre Street, north of the Union Bank.

The regular monthly meeting of the Castle Coombe Women's Missionary Society, will be held at the home of Mrs. Frank Rivers, on Wednesday, September 8, at 3 p.m.

High winds, on Monday, took the scow of the Saskatchewan ferry high up onto the south approach, placing the ferry out of commission for a few days.

The local fire alarm bell was sounded on Friday evening last for a blaze that had commenced amongst some rubbish in the hotel basement. Fortunately no damage resulted from the fire.

An endeavor is being made to consolidate the Langholm and Mayfield school districts. The number of children attending school in these two districts is small. It is thought that expense can be saved and a better schooling service provided for the children if the two districts are consolidated.

Mr. and Mrs. D. Watt and family, who were among the first settlers in our town, left last week for Melfort, Sask., where they intend making their future home. Although sorry to see them leave our midst, we hope that they will meet with success in their new location.

Mr. and Mrs. F. Pearce and family were visitors to town Monday, motoring through from Medicine Hat. Frank is now manager of the lumber yard of the Revelstoke Sawmill Co. at the gas city. Mrs. Pearce and children are paying a visit with the former's mother, Mrs. McKenzie, at the "Home Farm," Chesterfield. Mr. Pearce returned to Medicine Hat, Tuesday.

Copy for changes of adnet brought into this office after noon on Mondays of each week will POSTALY not be taken notice of until the following week, in so other arrangements being to be made with the publishers.

CASE

KEROSENE TRACTORS
SAVE YOUR HORSES

WALKING over plowed ground all day tires your team as well as the driver. How about pulling a load besides? In these days of scarcity of horse and man power the heavy farm work such as disking can be done most speedily and economically with a Case Kerosene Tractor. The 10-18 or smallest Case Tractor can pull an 8 ft. double action disc harrow set to full depth. Busy farmers can work the "iron horse" day and night if necessary. Don't forget that Case tractors operate over dusty fields without dust entering cylinders. The Air-washer fully protects the motor. The all cast steel spur gears are fully enclosed and run in oil. The weight of the Case 10-18 is only about 3,600 lbs., this, with the liberal sized tires prevents soil packing. Other important features explained in full descriptive literature sent out for the asking. Let us tell you more about the 10-18 or larger Case Tractors.

Alberta Machine Shop

"Yes, I'll make it. The track runs smoothly and dependably because I use nothing but Imperial Polarine for lubrication. That's the unbeatable combination which keeps the mull on time."

Accurate Thorough Lubrication

IMPERIAL Polarine gives thorough lubrication and every operating condition. Cars and trucks give longer, cheaper service when lubricated with Imperial Polarine.

Imperial Polarine will not break up or run thin under continued operation. It reduces friction to a minimum by maintaining a coating of oil on every wearing surface. It seals all the power behind the piston by establishing a perfect piston-to-cylinder seal.

Learn which of the three grades described below is best suited for your car from the Imperial Polarine Chart of Recommendations, which is on display wherever Imperial Polarine is sold.

Sold in one-gallon and four-gallon sealed cans, half-barrels and barrels, also in 12 1/2-gallon steel kegs, by dealers everywhere.
